

COVID Proof of Vaccination Requirement and the Student Exception Policy.

If a student is Not vaccinated and arranges to have the school nurse administer a COVID test (using the free ones the government gives out which the student will most likely have to provide) and the nurse certifies in writing the result this will suffice. They will then need to bring the certification with their ID to the assisted registration site in the Coral Lobby beneath the escalators.

If the school does not have a school nurse, the regular proof of vaccination requirement applies.
